Date: 2 July 2019

Subject: Maintenance Pack 11 for NX 12.0.2 and SC 12.0.2

To: All users of NX 12.0.2 and SC 12.0.2

From: The Siemens PLM NX and Siemens PLM Simcenter 3D Teams

We are pleased to inform you that fixes are available for the problems listed below. A maintenance pack (MP11), built for installation on top of Windows64 image of NX 12.0.2 and SC 12.0.2, can now be downloaded from the Siemens PLM Download Server.

This release includes the following project:

NX1202 MP3 Ship Enhancements

For details about this project please see **NX1202_mp03_ShipEnhancements.pdf** in the MP3 distribution package (**nx-12.0.2.mp03.zip**).

NX1202 MP4 Ship Enhancements

For details about this project please see **NX1202_mp04_ShipEnhancements.pdf** in the MP4 distribution package (**nx-12.0.2.mp04.zip**).

NX1202 MP5 CMM Inspection Small Enhancements

For details about this project please see **NX1202_mp05_CMM_Inspaction_Supplement.pdf** in the MP5 distribution package (**nx-12.0.2.mp05.zip**).

NX1202 MP5 Ship Enhancements

For details about this project please see **NX1202_mp05_ShipEnhancements.pdf** in the MP5 distribution package (**nx-12.0.2.mp05.zip**).

NX1202 MP7 CMM Inspection Small Enhancements

For details about this project please see **NX1202_mp07_CMM_Inspaction_Supplement.pdf** in the MP7 distribution package (**nx-12.0.2.mp07.zip**).

NX1202 MP7 Ship Enhancements

For details about this project please see **NX1202_mp07_ShipEnhancements.pdf** in the MP7 distribution package (**nx-12.0.2.mp07.zip**).

NX1202 MP8 Routing PLMXML Import/Export Enhancements

For details about this project please see NX1202_mp08_Routing_PLMXML_ImportExport.pdf in the MP8 distribution package (nx-12.0.2.mp08.zip).

• NX1202 MP8 CMM Inspection Small Enhancements

For details about this project please see **NX1202_mp08_CMM_Inspaction_Supplement.pdf** in the MP8 distribution package (**nx-12.0.2.mp08.zip**).

• NX1202 MP10 CMM Inspection Small Enhancements

For details about this project please see NX1202_mp10_CMM_Inspaction_Supplement.pdf in the MP10 distribution package (nx-12.0.2.mp010.zip).

This maintenance pack addresses the issues associated with the PR numbers and short descriptions listed in the table below:

Release	PR Number	Short Description
MP0	9208406	VR will not launch on installed NX (Unrestricted permission)

Release	PR Number	Short Description
MP1	2241354	An attempt was made to create a link between objects in different parts
MP1	7200188	Cannot CONST ARC or CIRCLE of Intersection between TORUS and Nominal PLANE
MP1	7416968	Need to support short and long option on tol/width
MP1	8345075	Not all MOM-Parameter are available in Work Instruction (as in Post)
MP1	8359422	Incorrect graphic representation
MP1	8371461	Part could not be saved in NX 12
MP1	8374293	Cyrillic symbols are corrupted in the Tool Description
MP1	8380827	Not able to save a part file which was last saved in NX 11 in NX 12
MP1	8381899	Copy Instance Attribute on Pattern Component
MP1	8816695	Wrong alignment from Counterbore Drilling Tool inside CAM by using MRL
MP1	8884887	Batch processing fails to run with Japanese folder, file and program group.
MP1	8903357	drag and drop your measure point in the point set
MP1	8962926	Mom variables are not there when customizing OWI
MP1	9014910	NX_CMM need to have the same rounding rule as drafting
MP1	9064202	Different Position between Tool_Tip and Tool_Mount is not honored inside Sys-Tr
MP1	9102577	Automatic Tracking Point Calculation is Wrong when Machine is Loaded
MP1	9108666	NXMGR: Import Assembly into TC uses DB_PART_MFKID instead of DB_PART_NO
MP1	9118661	Different values measurement report / NX results
MP1	9119253	NX CMM post processor output is out of synch with operation dialog selections
MP1	9119971	CMM: Results change to Collision Avoidance by path selection.
MP1	9134583	unable to sort/search feature list in the dialog box
MP1	9135343	multiple CMM dialogs do not have an Apply button

MP1	9146541	NX CMM alignment issues
MP1	9151572	Workpiece: Save as on a machining operation fails in managed mode
MP1	9152392	Stiffener was partially created along the path
MP1	9155030	Transition Boundary Issues (objects intersect)
MP1	9157678	Replacing a Component changes a path on a circle.
MP1	9162914	How to use commas in mapping attributes of Tc and NX
MP1	9165672	PMI setting - Update Reading Direction after View Rotate,applies to sketch dims
MP1	9170725	Tool Retrieve from Library does not use the special German Characters in NX 12
MP1	9170742	Report run attributes on overstock is blank
MP1	9172104	Support Steel feature attribute in spreadsheet driven by sketch expression
MP1	9172724	Profile/Plate Belt-Endcut corrupt after Limits update
MP1	9173389	Balloons with no text or leader attached cannot be selected
MP1	9173599	Unable to edit non leader balloon in NX 12.0.1 & later.
MP1	9178679	Post is not outputting correct B and C (fourth and fifth axis) word
MP1	9180469	Steel Distribution NX 12.0.2 : File Already Exists
MP1	9182753	Unable to assign reference part to altrep while importing part in Teamcenter
MP1	9183342	UGTOPV returns different errorlevel in NX 12
MP1	9188399	Profile/Plate trim taper extend keeping the wrong attributes
MP1	9189187	Unwanted message for parts with person model
MP1	9190906	cannot select balloon with no leader
MP1	9192627	Electrode Design BOM resets Blank REF_Z after moving EW_BLANK_PT
MP1	9196370	NX fails to read asserted mass values from JT
MP1	9206338	Internal error raised editing any Spline Path in NX 12.0.2

Release	PR Number	Short Description
MP2	7264978	Failed to change a direction angle of the dimension.
MP2	8337968	Match Face with Distance = 0 divides the target Face
MP2	8337976	Match Face with Distance = 0 creates wrong geometry in follow up flange
MP2	8337986	Match Face possible to create in NX 11 but not in NX 12
MP2	8354819	Angular measure between 2 faces - value and display are not correct
MP2	8358028	Replicated and redundant exploded views with same name in several drawings
MP2	8374007	Cannot deny Postconfigurator basic license to users with the opt file
MP2	8380733	Wave-Geometry-Linker Face Option Face Chain does not work with Tangent Faces
MP2	8381728	Box Selection is not possible in Wave Geometry Linker

	ı	
MP2	8382872	NX session freezes when opening part file
MP2	8382893	WAVE GEOMETRY LINKER leads to unwanted deselection of selected faces
MP2	8382966	OPC server NX-MCD unknown error connecting KEPserver AB-plc.
MP2	8382981	File Open takes more than 10 minutes
MP2	8383014	WAVE Geometry Linker: Selection Error
MP2	8383352	Selection body at Curve Intersection takes longer and longer
MP2	8383654	Poor Performance when measure distance between two single faces of EXTRACT_FACES
MP2	8383722	Part could not be saved
MP2	8383815	Select Intent Single Faces for single faces of Extract_Face poor performance
MP2	8385793	Active workspace panel does not show check-out information
MP2	8386514	spline control disappears when deforming
MP2	8539087	The dialog of Edit angular dimension is wrong.
MP2	8886850	Unable to load the subordinate DEs with JT MultiCAD
MP2	9025853	Wrong result after Exporting and reimporting geometry using Step242
MP2	9043775	There is a problem about name of the new part created by [Export Part]
MP2	9046888	unable to open Solid Works 2017 assembly in NX 12
MP2	9050305	drilling operation with use 3D IPW does not start at the very top of the IPW
MP2	9051575	Display of the Removed Volume is not honoring use 3D setting for IPW
MP2	9090185	Maximum RPM for turning ops, which worked in 11.0.0.33, is not used in 11.0.2.7
MP2	9104126	NXMGR: Import Assembly to TC will not import to second ItemType
MP2	9104447	MultiCAD Reuse DE Modified on Initial load
MP2	9110883	Not creating marking line on profile
MP2	9112448	Need different symbols for Sniped Angled and Sniped Square
MP2	9112670	Flip Tool Around Holder and tool cuts outside cut regions
MP2	9117468	CMM: PMI orientation and tolerance vector do not match.
MP2	9119833	PMI not started in 2nd NX session but invalid license checkout swaps the bundles
MP2	9122156	extraction path includes extra motion at the end
MP2	9123239	Save fails after running journal as Pre Action, and having used Manufacturing
MP2	9127539	Unable to display custom attribute value in result of Advanced Search of NX.
MP2	9127619	Support manufacturing information symbols in detail design section drawing
MP2	9129439	Close and Reopen Selected Parts
MP2	9130313	Expression value causes DXF export to fail
MP2	9133692	Finish Turning Operation Ignores locally Defined Axial Trim Plane in Cut Region
MP2	9134583	unable to sort/search feature list in the dialog box

MP2	9141721	The value of Name property is not reflected in the part export function
MP2	9151161	AM: wrongly getting message that no support is needed
MP2	9154688	Collar plates failures with Hull stiffeners
MP2	9154756	Save as of drawing with altrep - failed to find dataset of altrep
MP2	9157158	Problem with export DXF files while using setting file DXF/DWG
MP2	9160262	LOP_B3.52: Destroy IPW Resolution
MP2	9169228	Cutting Side of Shell plates is not according to cutting side rule
MP2	9178854	Assembly Sequence - Extraction Path with rotation causes drift at end of motion.
MP2	9178954	UGALTREP created by Save As cannot be loaded.
MP2	9179571	NX Save-as error: The attribute array element index is invalid
MP2	9179861	CAM Turning Operations with Suppressed Geometry fail to generate using NXOpen
MP2	9180497	Marking Line Same Profiles Disappear after Update marking lines
MP2	9181749	Attributes templates does not keep the unit of attribute in NX 12.0.1
MP2	9183450	Resolution after doing Enhanced IPW did not show consistent look
MP2	9188134	GRIP EDAs &NATTR and &ATTALL return DATE part attribute as STRING type
MP2	9190459	Post processing fails in managed mode if CAM part uses specification relation
MP2	9190696	Incorrect duplication of Tool-Id callouts in 2D FlatPattern views
MP2	9192627	Electrode Design BOM resets Blank REF_Z after moving EW_BLANK_PT
MP2	9193480	SB Flange: Edit Parameters gives an error
MP2	9194731	Synchronization Manager - Simulation slow and not smooth
MP2	9195378	Tool / Tool holder display disappears until restart NX session
MP2	9195811	TCAllowedChildTypes_ preventing creation of drawing using template
MP2	9196132	Make default selection intent for Bracket attachment limits as solid body
MP2	9196370	NX fails to read asserted mass values from JT
MP2	9197159	Selecting Spline Path raises an Internal Error.
MP2	9197231	Need a way to check thickness direction in basic design
MP2	9198081	Move object fails on double click-edit
MP2	9200870	NX - Extremely slow dialog performance editing features
MP2	9200922	Creating a nodal force report, trying to create a CSYS, unable to select nodes
MP2	9202224	An internal error message is raised during pocket operation.
MP2	9203428	Excess Material does not work in assembly context of PlatePreparation
MP2	9203567	after updating a NX 10 drawing in NX 12 dimensions lose reference
MP2	9203980	calling NXOpenPvtransManagerCreateJtCreator() method NX session freezes
MP2	9205771	Extraction path takes longer distance for play forward.

MP2	9205987	Expand tree (+) sign not displayed in NX Line Designer integrated with TC
MP2	9206922	Plate preparation nonplanar plate fails to mesh and honor metaform expressions
MP2	9208743	Scallop behavior has been changed for Surface Area Drive Method
MP2	9210180	NXMGR: Export Part will not create a CORP_CRITERIA Item
MP2	9212744	Edit Parting and Patch Surface throws IE with MW_PartingCoreSurfLayer 255
MP2	9214259	An error occurs by coding API or not
MP2	9214834	Spline Path cannot be edited for Deformable Part in 12.0.2.
MP2	9216010	Issues NX Electrode Design writing out attributes properly
MP2	9216387	NX CAM GMC Operation: Sub ops Label screwed up
MP2	9216858	Unable to modify a MOVE OBJECT feature
MP2	9217025	Workpiece - blank as facet body to specify problem
MP2	9218606	PR: Facet Body is not usable inside Geometry Selection
MP2	9221569	selection of Facet Body does not work anymore (Geometry Selection)
MP2	9222474	NX is going to hung state
MP2	9225336	NX CAM Update Problem: blank with facet body
MP2	9228757	Unable to open SolidWorks Assembly (*.sldasm) -PLMXML document contains no part
MP2	9230791	Internal errors reported exiting out of NX after adding a Sensor
MP2	9234213	Cannot select a Faceted Body as Blank Geometry in a Workpiece
MP2	9236494	Unable to select a facet body for part and blank geometry
MP2	9237450	Cannot select a Faceted Body as Blank Geometry in a Workpiece

Release	PR Number	Short Description
MP3	7419803	Would like to be able to select more than one feature to tolerance
MP3	7529069	FBM/MKE: Feature teaching creates attributes of type system instead of customer
MP3	8375928	Internal error when generating toolpath
MP3	8378962	Cannot use MKE due to Channel Command errors. No Operation and Tool types available
MP3	8383257	Texts are shifted in DXF file
MP3	8384163	CAM: Feature tagging works only in the beginning of a NX-session
MP3	8384475	Product Interface objects get Out of Date status by Delay Product Interface
MP3	8386138	Electrical Routing: Part Cleanup makes loaded harness corrupt
MP3	8386538	Unable to select Region for Trimmed sheet when Feature Preview is OFF
MP3	8386617	Flat Pattern size is incorrect; Flange with tangent web length reference
MP3	8386991	AM Build support display

MP11	9526146	Electrode EDM drawing does not use electrode name as advertised

Windows update instructions

The files contained in **nx-12.0.2.mp11.zip** are provided as replacements for previously installed NX 12.0.2 and SC 12.0.2 products.

For the Windows64 platform, you should have at least 10.40 GB of free space to unzip this file.

Version NX 12.0.2 or SC 12.0.2 must be installed before updating to version **NX 12.0.2.mp11**. Please be aware that these updated MP files will be superseded by the next maintenance release or maintenance pack installed on your machines.

To install the MP, change to the directory where you unzipped the **nx-12.0.2.mp11.zip** file, make sure the entire set of new MP files have execute access.

Then do either one of the following:

1. Run 'run_ugsupdate.exe'

This will read the %UGII_BASE_DIR% from the Registry and apply the update to the NX 12.0.2 or SC 12.0.2 folder.

2. OR, you may follow the instructions below to run ugs update.bat directly.

Before running the script, please make sure the environment variable **% UGII_BASE_DIR%** is set to the base directory of the NX 12.0.2 or SC 12.0.2 release or set to the appropriate installed directory on your system. Then execute the **'ugs_update.bat'** script.

For example:

```
Set UGII_BASE_DIR="C:\Program Files\Siemens\NX 12.0.2" cd nx1202_mp11 ugs_update.bat /v
```

The script supports a "/v" switch to turn on verbose messages while doing the file updates. The default operation of the script is non-verbose.

The script supports a "/d" switch. This will turn off the script confirmation prompts; useful for running the update in a batch job.

The script also supports a "/p" switch. This will turn off the initial confirmation prompt, but it

will display the final 'done' prompt. This is useful for running the update in a batch job where a final prompt is desired.

After the MP update has run successfully, the following identifying text will be written into the system log of every NX and SC session:

```
"NX 12.0.2.9 MP11, 02July19. See Maintenance Pack letter for detailed list of fixes."
```

If you have any issues with the installation or support of these fixes, please contact your local Siemens PLM GTAC support group.

Sincerely,

The Siemens PLM NX and Siemens PLM Simcenter Teams
